DECLARATION OF CONFORMITY

Hobro Rustfri Procesteknik A/S, Benschøj Industrivej 22, Onsild, DK-9500 Hobro (HRP) hereby declares that the products that are specially manufactured for use in the food products industry have been designed and manufactured with respect to the framework directive for food product contact materials, EU 1935/2004, and on the basis of the rules for good manufacturing practices pursuant to Directive EU 2023/2006.

HRP is in possession of relevant declarations of conformity and material certificates from its suppliers for the suitability of the materials for contact with food products. These are available upon request to competent authorities.

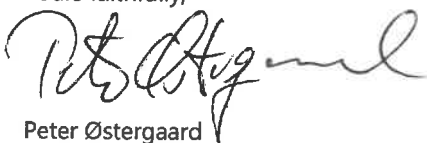

The declaration encompasses food product contact materials (FPCM). It is a precondition that FPCM be used and handled correctly. Risk assessments have been made of the FPCMs used based upon information obtained from the customer, including the PREN value of stainless steel as well as the choice of gaskets.

For gaskets, the assessment has been made that it is improbable that substances with limits in food products will migrate in quantities that would exceed such limitations under the specified use conditions. Upon request, we will furnish relevant information about these substances in a confidential basis.

It is important that components containing rubber/plastic are replaced with components approved for contact with food products. We would be pleased to be of assistance in providing consulting in connection with such replacements.

HRP is registered with the Danish Veterinary and Food Administration, and our obligatory quality assurance system is subject to inspection by the Danish Veterinary and Food Administration. HRP has, moreover, implemented DS/EN ISO 3834-2 as quality control system, including in among other things procedures for welding of stainless steel, risk assessments and traceability for food product contact materials.

Yours faithfully,

Peter Østergaard

CEO

BOTTLING PLANTS · MIXING UNITS · PASTEURIZING UNITS · MEMBRANE PLANTS · VALVE MATRIXES · STORAGE TANKS · VESSELS AND BOILERS
YOUR TRUSTED SUPPLIER OF ALL STAINLESS STEEL SOLUTIONS

Certified and registered as a supplier of Food Contact Materials.
Quality Control System according to ISO 3834-2:2005.
Certified for CE marking and welding of Structural Steel (DS/EN 1090. EXC. 3.)
